

ABSTRACT

A card type USB (Universal Serial Bus) connector, and a USB gender changer and a USB memory card using the card type USB connector. The connector includes a card type plug having a plug body and a plurality of pins on a top of the plug body and a card type receptacle having a receptacle body receiving the card type plug therein. A plurality of pins inside the receptacle body are disposed in correspondence to the plurality of pins of the card type plug so as to be electrically connected. Accordingly, the plurality of pins of the card type plug and the plurality of pins of the card type receptacle are electrically turned on or off according to contact of the plug body to the receptacle body or detachment of the plug body from the receptacle body.
